EDUCATION

University of Engineering and Technology, Vietnam National University (VNU-UET) Hanoi, Vietnam

M.Sc. in Software Engineering

2023 – 2025

- **GPA:** 3.87/4.00
- **Master's Thesis:** AI-based Software System for Early Diagnosis and Detection of Alzheimer's Disease in Vietnamese People

University of Engineering and Technology, Vietnam National University Hanoi, Vietnam

B.Sc. in Computer Science

2019 – 2023

- **GPA:** 3.60/4.00
- **Bachelor's Thesis:** Improving the Performance of Unit Test Case Execution for C/C++ Projects

RESEARCH EXPERIENCE

International University, Vietnam National University Ho Chi Minh City HCMC, Vietnam

Brain Health Lab, School of Biomedical Engineering

Part-time Researcher

2024 – Present

- Alzheimer's Biomarker Cross-border Development (ABCD) Project, Vietnamese-Swiss Joint Research Programme.
Supervisor: Assoc. Prof. Huong Ha
 - * Developed a modular machine learning framework, comprising predictor and explainer modules, for Alzheimer's disease (AD) classification using structural MRI data from a Vietnamese cohort (N=113).
 - * Identified the Generalized Additive Model as the most interpretable and robust approach (78.8% accuracy, 87.2% AUC) for the Vietnamese cohort, balancing performance with clinical explainability.
 - * Conducted a comparative analysis of structural features between the Vietnamese cohort (N=76, from April 30th Hospital) and the ADNI cohort (N=80).
 - * Showed that cross-dataset validation resulted in an approximate 10% to 25% drop in prediction accuracy, highlighting the need for population-specific ML models.

University of Engineering and Technology, Vietnam National University Hanoi, Vietnam

Department of Software Engineering, Faculty of Information Technology

Lecturer

2025 – Present

Lab Instructor/Research Assistant

2023 – Present

Undergraduate Research Assistant

2021 – 2023

- AKAUTAUTO: a proprietary software used for C/C++ unit testing with automated unit test generation.
Supervisor: Assoc. Prof. Pham Ngoc Hung
 - * Directed the research group and facilitated weekly technical reviews with the joint development team at FPT Software.
 - * Provided training and technical consultation to group members.
 - * Researched and implemented an optimized pairwise test case generation and integrated it with the classification tree feature.
 - * Developed a method to stub functions from built-in or external dependencies.

PRESENTATIONS

Oral Presentation

- “Unveiling Heterogeneity in Early Alzheimer’s Disease: A Data-Driven Exploration of Mild Cognitive Impairment and Normal Cognition.” at 10th International Conference on the Development of Biomedical Engineering in Vietnam
- “A Comparison of Machine Learning Methods for Alzheimer’s Disease Classification in Vietnamese Patients” at International Symposium on Information and Communication Technology (SOICT 2025).

Poster Presentation

- “Machine Learning-Based Analysis of Brain Atrophy Patterns in Alzheimer’s Disease: A Comparative Study Between ADNI and Vietnamese Cohorts” at International Conference on Knowledge and Data Acquisition and Applications & Asia-Pacific Symposium on Affective Science and Alzheimer’s Disease (IC-KDA & ASAD 2025).

AWARDS AND HONORS

IC-KDA Asian Society Against Dementia Conference Travel Grant, Korea	2025
Vingroup Innovation Foundation Master’s Scholarship, Vietnam	2024 – 2025
Second prize, The Scientific Research Conference for Undergraduates at VNU-UET, Vietnam	2023

TEACHING

Advanced Programming (INT2215) Lecturer	2025 – Present
Object-Oriented Programming (INT2204) Lecturer	2025 – Present
Object-Oriented Programming (INT2204) Lab Instructor	2023 – Present
Introduction to Informatics (INT1004 & INT1376) Lab Instructor	2023 – 2025

TECHNICAL SKILLS

MRI processing: CAT12, CONN

Programming: Python, JavaScript, C++, LaTeX

Languages: Vietnamese (native), English (IELTS 7.5 and TOELF IBT 106/120)
